Team meeting

From 12:45 until 13:15

Proflex Room Signage. Easy and reliable.

Our software can easily be connected to Office 365 or Exchange. If it is used with a touch panel, red and green LED lights show if a room is free or booked. The touch panel shows the organizer, the topic of the meeting and the meeting time. If the meeting room is free, a new booking can be made and/or extended instantly on the spot with a simple touch.

No more Double Bookings

Forget about double bookings, confusion and interrupted meetings. Book ad hoc meetings on the screen or use standard calendar software like Outlook 365 and Exchange.

Optimize the use of rooms

Increase the meeting room availability by releasing booked meeting rooms when no one showed up.
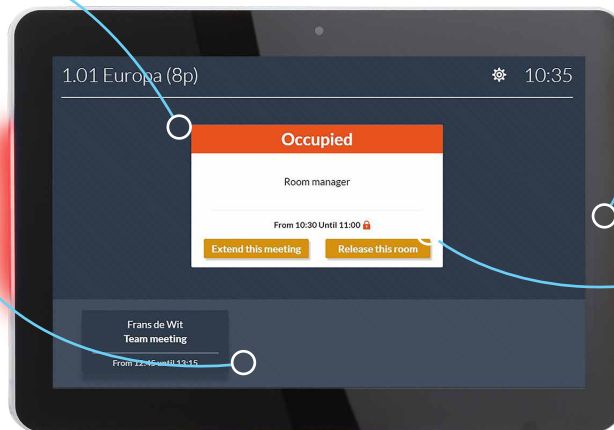

Plug and play

Proflex Room Signage is a Plug & Play system.
We ensure a safe and reliable connection to Office 365 or in-house Exchange.
The system is up and running in no time and requires no maintenance.

Booking made easy

Detailed booking information is displayed.

LED lights show if a room is booked or free.

You can end or start a meeting at the display.

Booking screens available in any language.
